

1. Foundation wall
2. Traditional render (optionally)
3. Foundation wall waterproofing - Atlas Woder Duo elastic sealing mortar (min. 2 coatings)
4. Adhesive for polystyrene, e.g. Atlas Hoter S - ETICS adhesive for polystyrene or Izohan Izobud WM-2K polymer-bitumen KMB compound (optionally)
5. Thermal insulation - XPS; thickness according to thermal calculations
6. Foundation slab
7. Cove of 4-6 cm radius, e.g. Atlas Filer PCC mortar or mortar for mounting
8. Atlas Hydroband 3G sealing tape
9. Protective layer, e.g. cement subfloor
10. Separating layer, e.g. PE membrane
11. Foundation slab waterproofing - Atlas Woder Duo elastic sealing mortar (min. 2 coatings)
12. Reinforced concrete subfloor slab
13. Substrate (lean concrete, compacted sand)

No. 2.5 Waterproofing joint between foundation slab waterproofing and wall waterproofing - risk of water under pressure
