

1. Foundation slab
2. Protective layer, e.g. cement subfloor
3. Separating layer, e.g. PE membrane
4. Foundation slab waterproofing - Atlas Woder Duo elastic sealing mortar (min. 2 coatings)
5. Reinforced concrete subfloor slab
6. Atlas Hydroband 3G sealing tape
7. Atlas Backer Rod
8. Expansion joint sealing
9. Tape for sealing expansion joints embedded in foundation slab structure
10. Substrate (lean concrete, compacted sand)

No. 2.6 Sealing of the expansion joint in the foundation slab - risk of water under pressure or risk of dampness
